[Important safety information for Heavy-Duty Post Shores users!](#)

If you currently own or rent Symons Heavy-Duty Post Shores, you must read this safety announcement immediately. All Heavy-Duty Post Shore applications must be reviewed and adjusted for possible changes in capacity.

[Pricing Announcement](#)

Steel prices have resumed their upward trend, with significant increases in February. New Symons pricing will be released, effective March 31, 2008.

[Introducing the Concrete Step Wizard](#)

[Introducing Arch-Crete Forming System](#)

Arch-Crete® is a lightweight, textured plastic wall forming system that provides decorative concrete finishes without form liners. The integral face texture is contoured with natural stone patterns for realism.

[Introducing the Concrete Step Wizard](#)

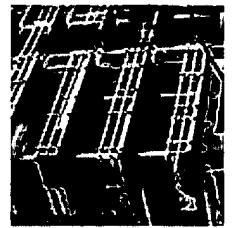

The Concrete Step Wizard and Riser Splice Angle are part of a new system designed to cut labor and material costs and improve productivity when forming stairs. This versatile system is easy to assemble and adapts to any size job.

Introducing Environmental Release EF

Environmental Release EF is an earth-friendly concrete form release agent. It is a truly green, biodegradable material, containing no petroleum products. It is a water-based formula that contains no VOCs, making it VOC compliant in all regions.

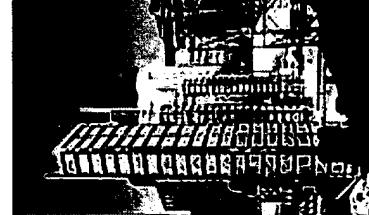

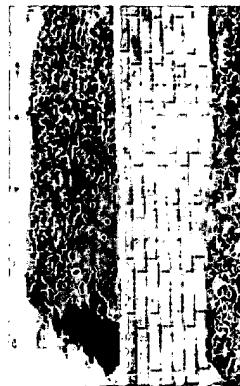

"A" Guardrail Post

The "A" Guardrail Post is now available for purchase or rental from Symons. The top adjusting wing nut makes adjustment quick and easy from a standing position. The post will clamp to any slab up to 29" thick. The post is then screwed or shot into the slab and lumber guardrails installed.

New and used excess inventory sale!

We're balancing and, in some cases, reducing our stock of select items. Don't miss the opportunity to purchase used equipment at incredible prices! New on the list: aluminum brick panels and curb forms.

Concrete forming and shoring systems

Symons is the leading manufacturer of concrete forms and shoring. We offer the most complete line of concrete construction systems and specialty products to improve construction operations.

The extensive Symons line of concrete forming products have helped contractors all over the world do their jobs faster, easier, safer, and more cost effectively.

Concrete chemical systems

Symons offers a complete line of concrete construction and concrete repair chemicals to satisfy project specifications and contractor requirements. Technical Data and Material Safety Data Sheets are available for these important products.

Decorative concrete systems

When specifications call for a decorative concrete treatment, you can count on Symons to have the right products to help you achieve a concrete finish that makes *you* look good!
